Naoki Kitagaki

A student at Kyoto University, majoring in architectural design and being in charge of a design project of library in Niigata Prefecture by an architect in the lab of Hirata Akihisa, awarded many times in Japan, has interned at three prominent architectural firms. I'm interested in architectural materiality and architectural design theory of Herzog & de Meuron. In Kyoto University, I am researching the deeper relationship between architectural materiality and human physicality.

Education

2021.04-

M.Eng in Architecture and Architectural Engineering
