

瀬戸内サーカスファクトリー

SETOUCHI CIRCUS FACTORY

Setouchi Circus Factory (SCF) is a leading contemporary circus company in Japan.

With the belief that uniqueness is born from the local "terroire", SCF is committed to the significance of creating culture together with the local community in the local area, and is creating new bonds and chemical reactions by collaborating with the lives of the local people, nature, and industry.

We aim to improve the quality of artistic creation activities and to create an environment in which contemporary circus and its people can work with vitality and peace of mind, while at the same time nurturing and building a system in society where circus can help revitalize local communities and foster human resources.

We will also nurture and build a system in which circus can contribute to the revitalization of local communities and the development of human resources. The future of Setouchi Circus Factory is an upward spiral that intertwines and sometimes fuses these two elements.
